IRONHORSE / RAILROAD CONTRACTORS

Track rehabilitation bid checklist

Organize condition information, quantities, and operating windows before requesting a bid.

Existing track

- ☐ Owner, location, subdivision or milepost, and site contact
- ☐ Track layout, inspection findings, and dated condition photographs
- ☐ Known rail sections, tie types, turnout details, and drainage concerns

Renewal scope

- ☐ Estimated ties, rail, joints, ballast, and turnout quantities
- ☐ Priority locations and the expected extent of surfacing
- ☐ Material supply, reuse, spoil removal, and disposal responsibilities

The work window

- ☐ Permitted closures and service that must be maintained
- ☐ Access, staging, equipment unloading, and protection arrangements
- ☐ Owner standards, acceptance inspections, reporting, and bid deadline

Planning aid only. Confirm the scope, applicable owner requirements, and responsibilities with the project team.
